

ADOBE ILLUSTRATOR – INTRODUCTION COURSE OUTLINE

APPLICATION: ADOBE ILLUSTRATOR

LEVEL: INTRODUCTION

DURATION: ONE DAY

WHO SHOULD ATTEND

The course is designed for new users of Adobe Illustrator or for users of earlier versions wishing to bring their skills up to the current level of this industry standard illustrating and drawing package.

OBJECTIVE

This course has been designed to introduce the new user to the array of features available within this professional design tool - now an industry standard among graphic artists, technical illustrators and desktop publishers. The course will enable the delegate to gain competence using the precision illustration and page design capabilities of the software, and teaches them to become confident with the range of features and functions shown below.

COURSE CONTENT

- Introduction to Adobe Illustrator
- Overview of the Illustrator Toolbox
- Drawing Bezier Curves
- The Pen and other Tools
- Selecting Objects
- Customising Colours
- The Colour Palette
- Saving Artwork
- Printing Artwork
- Creating New Paint Styles
- Creating and Releasing Guides
- Placing and Opening Artwork in other Packages
- Text Effects
- Creating Outlines
- Distortion Filters
- Path Filters
- Additional Tools

PREREQUISITE

Delegates should be competent in the use of the keyboard and mouse. Some previous experience with drawing or graphic software would be advantageous, but is not essential.
